AIR COMPRESSOR

Precision-Powered Air Delivery

Rotary Screw Air Compressor

Engineered for performance, reliability, and efficiency, the rotary screw air compressor is a turnkey compressed air solution ideal for demanding industrial environments. This complete package includes a high-performance air compressor, 35ft³ carbon steel air tank, refrigerated air dryer, and a four-stage filtration system—ensuring clean, dry, and consistent compressed air output.

Features

- **10 year Air End Warranty** - with annual maintenance plan
- **High-Capacity Air Output** – Delivers up to 123.6 CFM, supporting demanding, continuous-duty applications.
- **Complete Turnkey System** – Includes compressor, air tank, refrigerated dryer, and multi-stage filtration.
- **Direct Drive Motor** – Increases efficiency and reduces maintenance compared to belt-driven units
- **High Air Purity** – 4-stage filtration ensures ultra-clean output with oil content as low as 0.003 PPM.
- **Reliable Air Cooling** – Air-cooled system operates effectively from 23°F to 113

AIRCOMPRESSOR

Specs

Air Capacity: 123.6 cfm

Working Pressure: 116psi

Power Supply: 220V / 50Hz / 3-Phase

Air Tank Volume: 35.3 ft^3

Dimensions

- Compressor: 42" x 42" x 36""
- Tank: 24" x 24" x 72"
- Refrigerator: 24" x 24" x 18"

Weight: 646 lbs

Service & Support

Our products come with a comprehensive 3-year warranty, ensuring long-term reliability and performance. Plus, professional installation and in-depth training are included, so you can get up and running with confidence from day one.

Financing

We offer flexible financing options to fit your budget and business needs, making it easier than ever to invest in BridgeSaw products without upfront strain.
